

FIRST OPENAIRINTERFACE NORTH AMERICA WORKSHOP
JUNE 25-27, NOKIA BELL LABS, MURRAY HILL, NJ

Welcome to the OPENAIRINTERFACE Hands-On Training!

This session is labelled as “**OAI-Enabled Research and Development on the COSMOS and POWDER Platforms**” on the workshop program and is scheduled for **June 25th, Afternoon 4:30 PM – 6:30 PM**

Introduction: This will be a hands-on session where attendees will perform "scripted exploration" of the POWDER platform (<https://www.powderwireless.net>). Attendees will be required to access POWDER, using their own laptops, through ssh and/or web browser sessions (Chrome works best).

We recommend that the following instruction should be executed before the Training Session.

Sign up instructions: Before the workshop please request a POWDER account here: <https://www.powderwireless.net/signup.php?pid=oai2019>

Please do this well in advance of the workshop so that account creation does not hold up the session.

When creating an account, be sure to load an ssh public-key file as part of your request. Alternatively, you can upload an ssh public key after your account is approved and you are logged into the portal: <https://www.powderwireless.net/ssh-keys.php>

Here is a useful tutorial on ssh keys:
